

# INTRODUCING MANTELLISAURUS

When Gideon Mantell and wife Mary Ann described fossils they had found in the Wealden clays north of Lewes in the

1820s they realised they had come across something totally new; the original tooth so resembled that of an iguana's the creature was named Iguanodon. Recently the bones of this dinosaur have been under scrutiny, come along and find out more

**Gideon Mantell birthday memorial lecture**

**3<sup>rd</sup> February 2020 7.30pm**
